SLSNZ First Aid Levels

All first aid qualifications through SLSNZ have a two year expiry date, plus a three month grace period for members to refresh their qualifications.

SLS First Aid Level 1

Unit Standards: 6401, 6402, 6400

Prerequisites: Current SLSNZ member, 14 years of age

Duration: 2 days

Description: This is a 2 day resuscitation course covering the following topics:

Assessment of emergency situations, basic life support, soft tissue injuries, bleeding, shock, fractures and head injuries. Hypothermia, asthma, oxygen delivery systems, burns, asthma and basic drowning physiology.

Topic information

Primary Assessment:

- DRSABCD
- Response – AVPU
- Send for help – Position, Problem, People
- Airway
- Skin colour and temperature

CPR:

- Adult
- Child
- Infant
- Airway obstruction for all ages

Common first aid conditions:

- Injuries – fractures, dislocations, wounds, burns, soft tissue injuries – splinting, stiff neck collar, spinal injuries
- Medical conditions – seizures, epilepsy, diabetic emergencies, breathing difficulties; anaphylaxis, chest pains, stroke;
- Hypothermia, hyperthermia.
- Marine stings, eye injuries, poisons

Bleeding, signs and symptoms and treatment of:

- External bleeding
- Internal bleeding
- Amputation
- Impaled object
- Chest wounds

Shock:

- Signs and symptoms
- Circulation check – skin colour, temp, pulse, capillary refill.
- Treatment
- Secondary survey

Oxygen:

- Cylinder ID
- Safety
- Attaching the regulator/cracking cylinder
- Delivery devices and flow rates
- Indications for oxygen therapy
- Suction

AED – Introduction and demonstrate knowledge of and use of an AED

Basic drowning physiology

- Definitions (and the fact we don't say secondary/near-drowning etc.)
- Basic understanding of the drowning process (without using too much technical jargon and physiology).
- The physiological drowning process
- The effect of drowning on the lungs.

Assessment

Candidates are assessed in accordance with NZQA standards for the following unit standards:

- 6401
- 6402
- 6400

SLS First Aid Level 2

Unit Standards: 25411, 14473

Prerequisites: Current SLSNZ member, 15 years of age, SLS Level 1

Duration: 1 day

Note: During this course level 1 is refreshed

Description: This 1 day course commences with the same formative assessment as was conducted during the Level 1 course (Level 1 is refreshed). The course content covers knowledge and use of an Automated External Defibrillator (AED) and its integration into basic life support; the management of orthopaedic trauma/medical emergencies including the immobilisation of major fractures and spinal management, and the preparation of a patient in for transportation to hospital. The course will also cover patient monitoring practices in relation to the SLS environment.

Topic information

Automated External Defibrillator (AED)

- Demonstrate the use of the AED in combination with Basic Life Support
- Recognise when an AED is required;
- Basics of ventricular fibrillation and defibrillation
- The importance of early defibrillation in case of cardiac arrest
- What makes a victim suitable/unsuitable for defibrillation
- Maintenance requirements of AEDs
- Operate the AED efficiently and safely

Oxygen:

- Cylinder ID
- Safety
- Attaching the regulator/cracking cylinder
- Delivery devices and flow rates
- Indications for oxygen therapy
- Suction

Patient monitoring (including but not limited to):

- Heart rate
- Breathing rate
- Temperature
- Blood pressure

Packaging patients for transport:

- C-spine immobilisation
- Become familiar with correct transport methods through the participation of skill stations centred around the expectations of the primary resource and user's manual recommendations, as well as current pre-hospital emergency care practices

Scenarios:

- Correctly perform, as a lone rescuer, the assessment of an unconscious, non-breathing victim who has no signs of life.
- Execute different scenarios without failure (shockable, non-shockable)
- Demonstrate clinical techniques or methodologies that have proven to be most effective at delivering a desired outcome and are actively promoted across the pre-hospital emergency care sector

- Demonstrate the ability to include prevention of threat from environmental hazards; and injury from the use of incorrect techniques.

Definitions

Current pre-hospital emergency care practices:

For the purposes of this standard, these refer to clinical techniques or methodologies that have proven to be most effective at delivering a desired outcome and are actively promoted across the pre-hospital emergency care sector.

Extrication devices:

May include but are not limited to: long spine board, short spine board, basket stretchers, scoop stretchers, traction and splint devices. These devices are used to safely move patients from difficult locations. The device used will vary according to the situation and injury, and availability of equipment.

Risk to patient safety:

Includes deterioration in medical condition, further injury, the detaching or loosening of safety devices.

Rescuer safety:

Includes prevention of threat from environmental hazards; and injury from the use of incorrect techniques.

Assessment

Candidates are assessed in accordance with the following NZQA unit standards;

- 25411
- 14473

SLS First Aid Level 3

Unit Standard: 25412

Pre-requisites: Current SLSNZ member, 17 years of age, SLS Level 1 & 2

Duration: 3 days

Note: During this course level 1 & 2 are refreshed

Description: This 3 day course refines all of the skills already learnt in the previous levels plus extends the lifeguard in their knowledge of drowning physiology, circum-rescue collapse, and assessment of non-fatal drowning, scene management, advanced monitoring (Pulse oximetry, blood glucose, and chest auscultation) and triage.

Topic information

Learners will receive knowledge, and engage in skill stations & simulated emergency events as a 'pre-hospital emergency care provider'. Learners must demonstrate the management of the patients relative to the situation to, minimise, stabilize or improve the patient's outcome to be successful in being awarded with this unit. The facilitator will ensure the 'events' are relevant to the Learner's own setting.

Learners will be expected to acquire knowledge, practical skills and experience to:

- Assess and manage a range of pre-hospital emergency care situations with the use of technology by engaging in simulated activities from a range of different emergency care situations
- Demonstrate and apply knowledge of devices and/or techniques to manage patients in emergency situations;
- Monitor patients and provide information in a range of emergency situations relevant to surf lifesaving situations (including Pulse oximetry, blood glucose and chest auscultation)
- Engage and interact in peer assessment opportunities in order to facilitate optimum understanding of key concepts and skills
- Become familiar with correct pre-hospital emergency care methods through the participation of skill stations centred around the understanding of the knowledge and skill expectations of the primary resource, relevant equipment user's manual recommendations & current pre-hospital emergency care practices

Competence must be demonstrated in a minimum of two different emergency situations which may be real or simulated.

Course topics covered must include but are not limited to;

- DRSABCD
- Anatomy and physiology considerations
- Scene assessment & the physiology of drowning
- Patient triage
- CPR single to multiple surf considerations
- Shock management
- Oxygen therapy
- Advanced airway management
- Suction
- Defibrillation
- 2^o Survey conscious and unconscious patients

- Vital signs & readings (blood pressure etc.)
- Bleeding control & management
- Major wounds management
- Soft tissue management
- Dislocations & fractures management
- Head injury management
- Spinal management
- Extended care considerations
- Positioning
- Movement from danger
- Environmental conditions hyperthermia
- Hypothermia
- Medical conditions asthma
- Anaphylaxis
- Diabetes
- Epilepsy
- Marine Stings
- Burns
- Critical care and after care management

Definitions

Basic pre-hospital emergency care:

For the purposes of this unit standard, this refers to that phase of emergency care that recognises and responds to respiratory and circulatory insufficiency, changes in levels of consciousness, and responds to other conditions using devices and/or techniques readily available to non-health professionals, prior to transfer of care to ambulance crew or other health care professional.

Current pre-hospital emergency care practices:

For the purposes of this standard, these refer to clinical techniques or methodologies that have proven to be most effective at delivering a desired outcome and are actively promoted across the pre-hospital emergency care sector.

Assessment

Candidates are assessed in accordance with NZQA standards for the following unit standards:

- 25412

Pain Relief Module

This is an optional module which can be added into Level 3. Clubs that wish to have this module added to their Level 3 course must seek approval from SLSNZ.

Prerequisites: Current SLSNZ member, 18 years of age, SLS Level 3

Duration: 3 hours

Note: This can be refreshed biannually along with Level 3

Description: The training in the use of Methoxyflurane (MOF) will include the effective use of Paracetamol as a total pain management regime. It will involve some pain physiology, use of pain relief with other resources such as splints and oxygen and conclude with formulised assessment

Topic information

- Identify when the use of MOF is justified
- Contra indicators in the use of MOF
- How to administer the MOF
- Patient monitoring / side effects
- Disposal of used MOF
- Recording the use of MOF

Recognition of Prior Learning

Surf Life Saving members are able to get recognition of prior learning for some external first aid training.

Please forward your current external first aid training certificates to membereducation@surflifesaving.org.nz to see if you qualify for recognition of prior learning. If we are able to cross credit your training over to the SLS first aid levels, this will be confirmed via email and updated on the PAM database.

Who Can Deliver SLS Levels – Providers

The following providers have been approved to deliver the levels outlined above in the format and structure prescribed by SLSNZ. Quotes from providers are located in Appendix 1 of this document. Please only contact providers if you need to make a booking – quotes provided in the appendix are designed to be used for funding applications.

Delivery of Courses

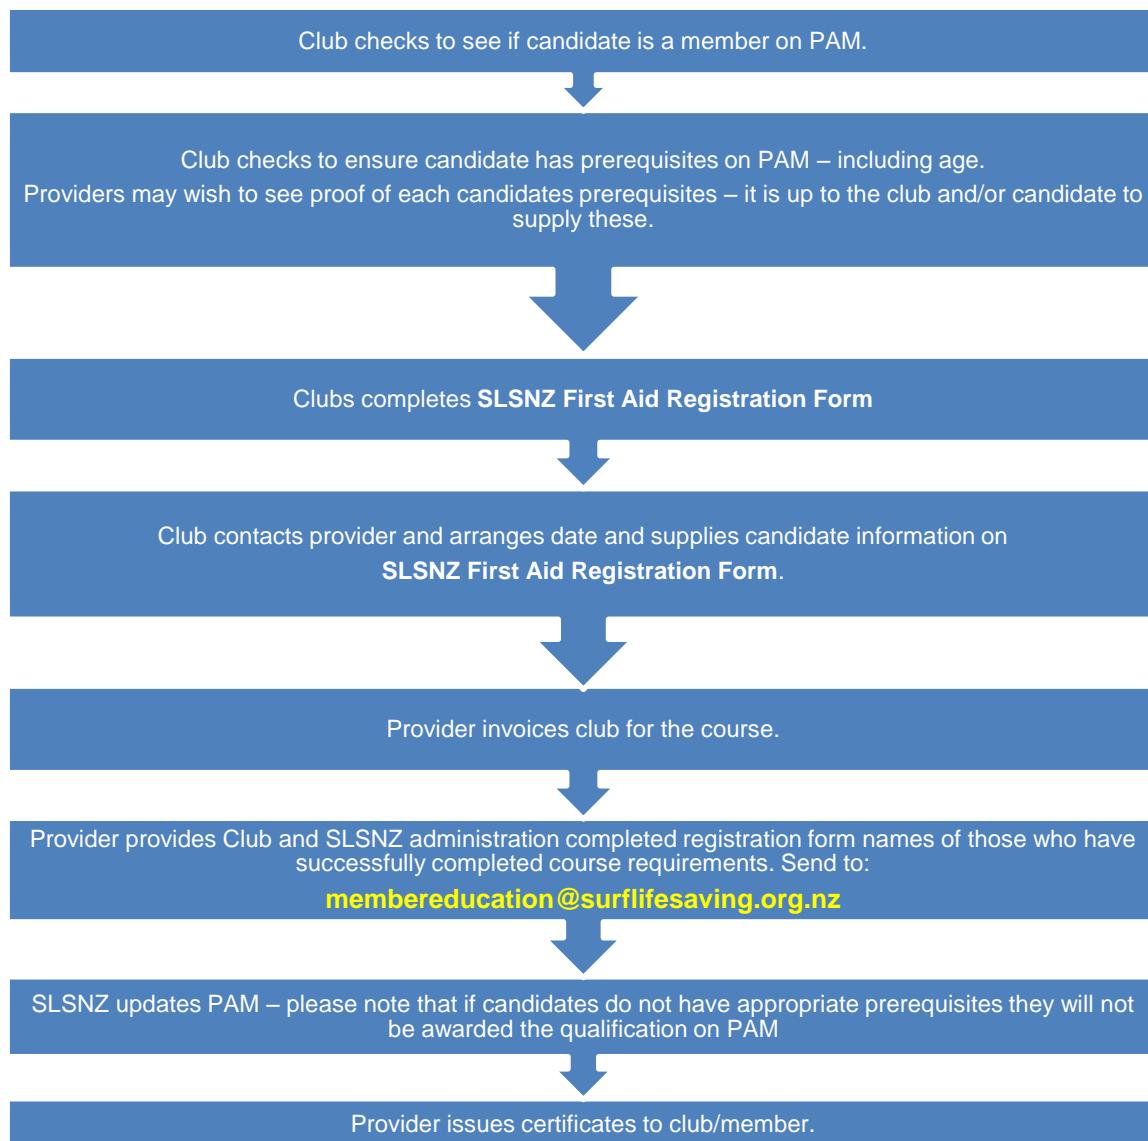

There are two main ways clubs can have First Aid courses delivered for them, below we outline different options available to members. In the coming season both delivery methods will be utilized.

Club Arranged Courses

Details

Courses are arranged by the Club directly with the provider to organise participants, venue and date. Clubs may arrange with other Clubs to fill a course they have arranged. To assist with funding quotes from providers and a letter of support from SLSNZ is located on the SLSNZ website.

Process

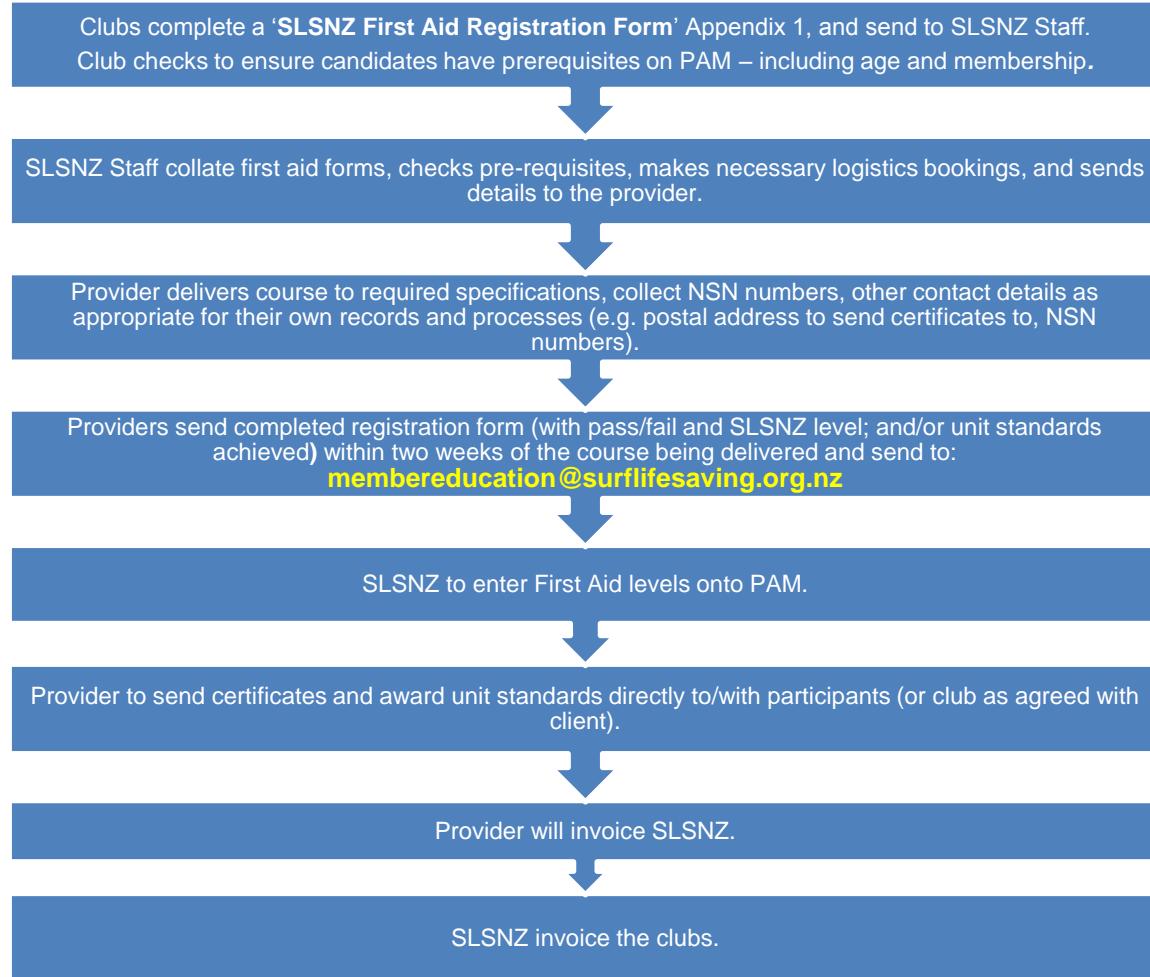

Surf Life Saving New Zealand Arranged Courses

Details

For courses arranged by SLSNZ, clubs will deal directly with SLSNZ staff for booking courses. An effort will be made to ensure each club is given equal opportunity for places on courses.

Pacific Medicare

95 Oceanview Road
Mt Maunganui, Tauranga 3116
info@pacificmedicare.com

Background

Pacific Medicare has been providing First Aid and Pre-Hospital Emergency Care (PHEC) training courses and Emergency Care equipment and trauma kits to Surf Lifesaving clubs, schools and organisations in New Zealand since 2007.

We believe that any form of learning should be fun, practical and build confidence. Our trainers are lifeguards who are also educators and focus on highly practical, scenario based relevant course content.

Delivery Area: Based in Tauranga, can deliver anywhere in North Island

Maximum of 20 people in any one course, however additional participant numbers above 20 are to be negotiated on an individual needs basis.

- All cost are + GST.
- Travel and mobilization costs including mileage are in addition to courses costs – all steps will be taken to minimize any mobilization costs with full transparency

The costs include:

- All manuals and training equipment including airway manikins, oxygen, stretchers & defibrillators, data show equipment and trained and experienced Instructors.
- Costs are based on training at regional SLSNZ clubrooms – no venue hire costs.

Costs include registration of units. Does not include NZQA hook-up fees

ProMed

22 Sheffield St, Washdyke, Timaru 7910
PO Box 46181, Temuka 7948
info@promed.ac.nz

Background

Pro+Med (NZ) Ltd, owned by Don and Jocelyn Gutsell, is a New Zealand Limited Company supplying to the people of New Zealand their requirements in pre hospital medical training, from first aid to NZRC Level 7 courses.

We became a Registered PTE in 2004 and are accredited to assess against unit standards by the New Zealand Qualifications Authority. We are also recognised and approved by (not limited to) the New Zealand Royal College of GPs and the New Zealand Dental Association. Our vision is to provide reliable and quality training to further improve individual knowledge and efficiency of the people of New Zealand and to meet our client expectations 100% of the time. Our staff are professionals presently practising in their respective fields or have extensive experience in their field of expertise.

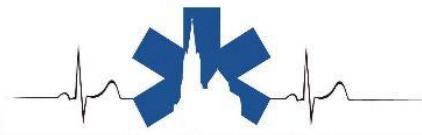

Delivery Area: Based in Tauranga, can deliver nationally

We are offering Surf Life Saving 10% discount off normal retail price. All prices are excluding GST

Medic First Aid

137 White Road RD1

Reporoa 3081

0800 112131

www.medicfirstaid.co.nz

Background

Medic First Aid has engaged the services of and employs the instructors previously utilised by Lifesaving First Aid to ensure the continuation of the successful programmes that have been operating within SLSNZ.

The first aid training uses updated power point presentations supported by new DVD material offering excellent in-depth subject knowledge; many of our instructors have both SLS and ambulance experience providing real life explanations to reinforce learning. MFA recognises existing surf lifeguard skills and focuses on training that is relevant to the environment, conditions and scenario's likely to occur on patrol.

We make learning to protect and save lives easy.

Delivery Area: Based in Reporoa, can deliver nationally
