

New Zealand Government Alert Levels - Surf lifesaving Capability/Operational Compliance

- The '**Alert Levels**' below are determined by the Government and specify the public health and social measures to be taken in the fight against COVID-19. Surf Lifesaving have applied these with current information and developed a **Capability/Operational Compliance Matrix**, this is designed to support best practice decision making for Surf Lifesaving.
- The '**Range of Measures**' may be updated based on new scientific knowledge about COVID-19, information about the effectiveness of control measures in New Zealand and overseas, or the application of Alert Levels at different times (e.g. the application may be different depending on if New Zealand is moving down or up Alert Levels). Surf Lifesaving may also update the '**Surf Lifesaving Capability/Operational Compliance Matrix**' on the basis Government updates or sector wide decisions around operational compliance.
- Government advice is that the '**Alert Levels**' may be applied to a town, city, territorial local authority, regional authority or across a national level. Different parts of the country may be at a different alert level at any given time, the Government has signalled we can move up and down '**Alert Levels**'. This could be complex in nature, however Surf Lifesaving Staff will be informed and be able to guide Clubs as status of the changing '**Alert Levels**'.
- Restrictions are cumulative (at Alert Level 4, all restrictions from Alert Level 1, 2 and 3 apply).
- Surf Lifesaving New Zealand will continue to produce Operational Memos clarifying and further outlining the Surf Lifesaving Capability/Operational Compliance, these can be found here: <https://www.surflifesaving.org.nz/organisation/covid-19>
