## INTRODUCTION

Surf Life Saving New Zealand (SLSNZ) wants to ensure that key equipment used for lifeguard patrols is standardised across all patrol locations.

By providing SLSNZ National Approved Standards\*, it ensures surf lifeguards can be easily identified by members of the public and other emergency services.

This is intended to promote our services as unified and professional. It also ensures that safety messaging is aligned, consistent nationwide, and our key equipment is correctly branded.

The equipment in this document is aligned to National Standard Operating Procedures (NSOPs) and Australian/New Zealand standards where applicable.

The equipment used by patrol members must be of a high standard and all suppliers named in this document are aware of the standards expected by SLSNZ and our members.

To make it easier for clubs and services, SLSNZ has worked with the suppliers to help ensure:

- Consistency and standardisation in the product supplied
- Ideal ordering periods and transparent lead times\*\*

Some equipment items in the document have 'exclusive suppliers' these are the only suppliers authorised to supply that specific piece of equipment – this is to ensure brand and signage standards are met. Many of these items are linked to specific SLSNZ NSOP's.

Fixed costs have not been included as fluctuation in costs makes a document like this redundant almost immediately after its published.

Clubs and services should contact the supplier to get a valid quote.
